OSSIA VMS - HARDWARE

PROVISION-ISR dedicated VMS hardware are planned, designed and built by Provision-ISR with the sole purpose of running OSSIA VMS: a top quality Central Management System allowing the user to view and manage multiple devices from remote.

DEC-0104(1U)

1 HDMI INPUT / 4 HDMI OUTPUT 144CH STANDALONE/OSSIA VMS DECODER

The ideal solution for control rooms.
Provision-ISR DEC-0104(1U) decoder makes the difference when it comes to durability.
The decoder can display up to 144 channels on 4 separate screens, taking the most resource-demanding task from the client – to itself.
By doing so, the client is left free to deal with the CCTV unexpected tasks such as handling events, playback, alarms, etc…
Each of the 144 windows is dynamic: the user can choose if to use it as a live window, playback window, or an alarm pop-up window!
